**BRONZE PACKAGE**

A COMPLETE PHOTO-FINISH SOLUTION

The **BRONZE PACKAGE** is an all-inclusive photo-finish system from Lynx – the leader in Fully Automatic Timing (F.A.T.). With this entry-level system, all you need is a computer to deliver NFHS-compliant results at your Track & Field meets - no matter the size.

When your program makes the switch to F.A.T. results, everybody involved in your meets will benefit: Athletes, Coaches, and Meet Administrators. Lynx allows you to use your volunteers much more efficiently, so there's less stress on officials and volunteers, and hand-timers become unnecessary. And thanks to our LynxPad software, you can easily setup athlete entries, seed marks, and the printing of results at the end of the day.

The Head Timer and all the athletes and coaches will love the fact that race images are reviewable and accurate to 1/1000th of a second. Disputes over close finishes and athlete ID's will become a thing of the past.

COMPONENTS

- **Camera**: **EtherLynx 2010,** 1000 frames/second, monochrome, timer-enabled, fully-upgradeable
  - C-Mount f1.2, 12.5-75mm zoom lens
- Start Sensor & Capture Button
- Complete Professional Tripod and mounting hardware for precision adjustment
- All-inclusive Power, Ethernet, & Start Cable Set
- Print Laminator & 50 Foam Boards for instant revenue generation with photo-finish image sales
- Full Access to Lynx Technical Support
- 1-Year Renewable Warranty
- **FinishLynx32** - Photo-Finish Software
- **LynxPad** - Event Management Software

BRONZE PACKAGE: $7,495

FEATURES AND BENEFITS OF THE BRONZE PACKAGE

This NFHS approved Photo-Finish and Timing system from Lynx is a perfect introduction to the universally accepted and field-proven Lynx technology. At the heart of the system is the **EtherLynx 2010** digital photo-finish camera, which uses the same data transmission protocol as the internet itself.

With this proven technology powering the communication between the photo-finish camera and computer running **FinishLynx**, and more than a decade of use in the field, Lynx technology is solid long-term investment for your program. Continue to learn more about all the other components included in the Bronze Package.

PHOTO-FINISH RESULTS PRINT-OUT

One high school in Maine started printing Lynx images on t-shirt transfers and applying them to event t-shirts, but later switched to selling laminated boards. At **$10 per print**, not only are the images affordable enough for students and their families, but you can enjoy an **$8 margin** on every image sold.

PRINT LAMINATOR & 50 FOAM BOARDS

Every Package comes with a **Print Laminator Kit** and **50 Foam Boards** so you can begin generating revenue for your athletics program at your very first meet using FinishLynx.

Because FinishLynx automatically formats high-resolution photo-finish results after each heat, meet volunteers can simply print the photos and sell them as souvenirs to parents, athletes, and fans alike.

500-FOOT START CABLE

This 500' start cable and sensor work with any standard start pistol and allows meet administrators to reach any of the four available start locations on the track without sacrificing the accuracy of your F.A.T. results. The RadioLynx wireless start option is also available for those looking to further increase their mobility.

LYNXPAD: MEET MANAGEMENT SOFTWARE

LynxPad is a meet management program that organizes athlete names, numbers, schools, and seeding marks in a simple, file-based format. Because LynxPad is fully integrated with FinishLynx, you can generate lane number, heat, and results info with the simple click of a button.

ETHERLYNX 2010 PHOTO-FINISH CAMERA

The EtherLynx 2010 is the heart of the Bronze Package. It captures F.A.T. results at 1000 frames/second with an image height of 500 pixels. And with an accuracy of up to $1/1000^{th}$ of a second, you'll have clear results no matter how close the finish.

MANUAL ZOOM LENS

The EtherLynx 2010 camera comes standard with a C-mount Manual Zoom Lens:

Iris: $f1.2 \sim f16$
Zoom: 12.5 ~ 75mm
Focus: 1m ~ Infinity

TECH SUPPORT & 1-YEAR WARRANTY

Because Lynx technology is built, tested, and serviced by our in-house professionals, all of our packages come with unparalleled technical support. In addition to the 1-year renewable warranty, the Bronze Package includes the latest hardware & software manuals as well as a condensed "Quick-Start Guide" for easy setup right out of the box.

TRIPOD & MOUNTING HARDWARE

The Bronze Package includes a sturdy camera tripod and all the necessary mounting hardware and accessories. This fully-adjustable tripod can reach up to 7 feet high and allows for plenty of flexibility with different venue and finish line configurations.

POWER & NETWORK CABLE-KIT

This package includes all the Power, Ethernet, and Serial cables you need to integrate your hardware across a powerful communication network. Lynx systems can also interface with popular *third-party* devices like scoreboards, wind gauges, etc.

FINISHLYNX: TIMING & RESULTS SOFTWARE

The FinishLynx software is what truly brings your photo-finish results to life. This computer interface (now in its 7th generation) seamlessly captures and integrates athlete data, results, and photo-finish images into one user-friendly application. With the ability to support a number of software plug-ins and countless third-party components, FinishLynx helps produce accurate, real-time results with the click of a button.

BRONZE PACKAGE: $7,495

MAKING THE SWITCH TO PHOTO-FINISH TIMING

The Bronze Package is a perfect entry-level solution for any program thinking about making the switch to photo-finish timing. Whether you want to make your existing meets more efficient or are looking to host regional or state-wide events, Lynx packages contain everything you need – from start to finish.

Lynx systems are used by over 1000 high schools across the country and have become the standard for results production at all levels of Cross County and Track & Field: from the Nike Cross Nationals and Boston Indoor Games to the US Olympic Trials. Purchasing a Lynx F.A.T. system is an investment that will benefit your program for years to come.

The *modular* design of Lynx Packages means that the Bronze System contains all the key components for powerful F.A.T. results. If your needs change over time, upgrading your system is as simple as adding new components to your existing package – nothing you buy will ever go to waste.
